REMARKS

Applicants amend the Specification to incorporate a revised Sequence Listing. No new matter is added herein, as these sequences were all included in the original filing documents.

15 Substitute pages 66-91 (26 sheets) are attached hereto for insertion into the Specification. Reference to the new sequence 26 is added in the figure legend to Figure 2.

Also enclosed is a write protected floppy diskette with the sequence listing generated by the Patent Office's PATENTIN 20 program. The Diskette should comply with the requirements of 37 CFR §1.824 and is an ASCII file generated from an Apple Macintosh compatible computer with a Macintosh 7.5.5 operating system. The Sequence Listing originally was generated with the PATENTIN program and revised with the additional sequence from 25 Figure 2. If the diskette has been damaged, please call Applicants and a replacement diskette will be provided. A hard paper copy printout of the diskette is attached thereto.

I hereby state the informational contents of the paper and computer readable copies of the Sequence Listing, submitted in 30 accordance with 37 CFR 1.821(c) and (e), respectively, are believed to be the same. This submission introduces no new matter, since enclosed sequences are the same as sequences which were submitted in priority documents.

Applicants have invested over four cumulative hours of 35 significant labor and care in preparing the present submission. The enclosed items are a bona fide effort to bring the present application into full compliance with the rules for sequence
